Hi Mike,

Craig and I both have been deployed to Durango for the Gold King Mine blowout. So we won't be there. We'll be busy down here for quite awhile.

Hi guys:

Jessica told the county commissioners (now she has brought her version of the story to them) that EPA will be on site August 20 and 21st. I have not heard anything about this from you, so I thought I would check. I understand you were going to visit on your end and determine a work plan (if any) and let us know so we can coordinate on our end.

Have you guys had any discussions on this? I have meetings out of town the 20th, but am open the 21st.

I suspect this too is factually incorrect, but thought I would ask.

Thanks,

Mike

Hi Mike,

I am available today, if we need to talk further. As Craig mentioned, Jessica's statement is factually incorrect. We didn't see anything different when we met with Jessica than when we walked the site with you. I'm not sure what she is alluding to. If we need to set the record straight with the Mayor or the Commissioners, let's talk.

Mike,

The quoted statement is factually incorrect. At no point did I observe city or state employees ignore anything Jessica pointed out to us. We (the OSCs and city/state personnel) had frank conversations about all of her concerns. I'm out on leave the rest of this week, but I'll be around next week on response duty. If you or anyone in your food chain wants to chat Monday, let me know. I believe Joyel is available this week if this is urgent.

Hi Craig,

Just thought I would follow-up so you have my email and you keep me in the loop on the possible testing in the area. I am already getting asked by the Mayor about this. Jessica has sent a notice to be on the agenda for the city commission meeting Monday. Quoted from her email "The topic will be the EPA at the Roundhouse Subdivision, the numerous sites that the City and State employees walked over, did not see or ignored that the 2 On-Scene Coordinators and I found coming up from underneath the ground."

You have a response or some info related to this?

Thanks,
Mike
